Subject: HPNS | Parcel A fact sheet
Attachments: EPA Draft_ParcelAFactsheet_MgtDraft_v11.docx

Brianna,

Thank you for being open to review once more. Below are some screenshots for some of the formatted sections.

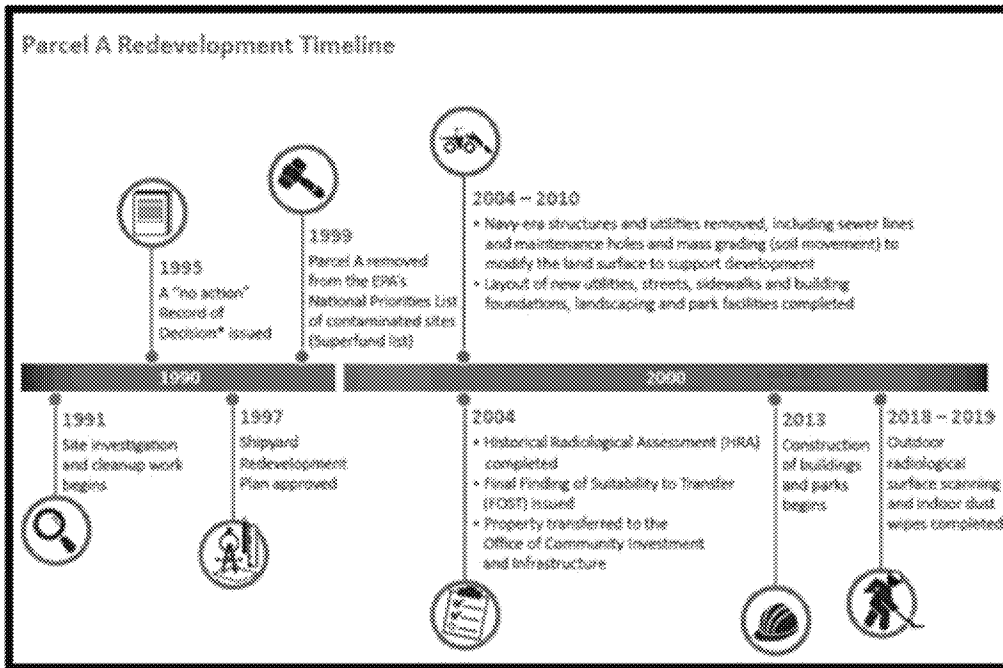

The Hunters Point Naval Shipyard Superfund site (Superfund site) does not include Parcel A. This area was largely used for residential and administrative purposes, and no site-related contamination remains on Parcel A. As such, the United States Environmental Protection Agency (EPA) has deleted Parcel A from the National Priorities List of contaminated sites (or Superfund list).

Based on information gathered since 1991, EPA is confident Parcel A is suitable for work, recreation and residential use. Results from recent radiological surface scanning done by the California Department of Public Health (see page 3) provide additional evidence that people are not being exposed to radiological hazards at Parcel A. The Office of Community Investment and Infrastructure (successor agency to the San Francisco Redevelopment Agency) will continue to safely redevelop Parcel A, working with its development partners.

AT A GLANCE

- Parcel A occupants are not being exposed to site-related contamination
- Parcel A is suitable for residential use
- Parcel A is no longer part of the Hunters Point Naval Shipyard Superfund site
